

# Are you a graduate student interested in e-health?

**The Health Telematics Unit (HTU), as a partner in the Building Capacity in Health Informatics for Professionals Project, is pleased to offer 3 e-Health courses.**

These courses are part of a series of 10 online courses that may be taken for credit from one of the following partner universities: University of Victoria, University of British Columbia, University of Alberta and University of Calgary. They will contribute to a Health Informatics masters degree planned for UVIC.

## **E-Health Sustainability: From Business Case to Policy - Fall 2003**

This web-based graduate course focuses on the issue of sustainability and how e-health applications can be planned in a manner that encourages ultimate integration and routine use.

Instructor: Dr. RE Scott. Health Telematics Unit, University of Calgary

Email: [rescott@ucalgary.ca](mailto:rescott@ucalgary.ca)

## **Introduction to Telehealth and Telehealth Research - Fall 2003**

This web-based course provides an introduction to telehealth and telehealth research. It includes basic telehealth concepts and an examination of research conducted in both clinical and learning applications. An historical perspective is taken on the differences and similarities of applications and research among Canada, US, UK and Australia.

Instructor: Dr. Marilynne Hebert. Health Telematics Unit, University of Calgary

Email: [hebert@ucalgary.ca](mailto:hebert@ucalgary.ca)

## **Evaluation in e-Health – Winter 2004**

This web-based course offers practical insights and understanding of an evaluation process for e-health initiatives. This includes assessing the effectiveness of e-health programs, evaluation design, data collection and analysis, as well as recommendations to assist decision-makers.

Instructor: Dr. Marilynne Hebert. Health Telematics Unit, University of Calgary
