

# Stakeholder Readiness for Telehomecare Diabetic Support

**Dr. Marilynne Hebert**  
**Principal Investigator**  
2001 – 2002

*Primary Investigator:* Dr. Marilynne Hebert  
*Primary Collaborators/Partners:* Mrs. Barbara Korabek  
Ms. Marie-Josée Paquin  
Ms. Sharon Iversen

*Primary Location:* Calgary, Alberta  
*Funding:* Calgary Regional Health Association (CRHA)

***Research Question:* Compared to traditional care, how do stakeholders (clients, health care professionals and administrators) perceive the characteristics of the telehomecare technology and its implementation in CRHA? A qualitative methodology will be used to explore the perceived attributes of using the technology as well as organizational strategies that may be useful if telehomecare is selected as a service delivery option. A purposive sampling method will be used to select “information-rich” cases, which can best generate the desired data. Data will be collected via focus groups and interviews with clients, homecare nurses, physicians and key decision makers.**
